SUMMARY

Computer Science graduate (May 2026) with hands-on experience in cloud infrastructure, CI/CD automation, containerization, and backend development. Skilled in AWS, Docker, Kubernetes, GitHub Actions, Linux, and RESTful APIs with experience deploying scalable applications and automating development workflows. Passionate about DevOps, cloud engineering, infrastructure automation, and site reliability.

TECHNICAL SKILLS

Cloud & DevOps: AWS EC2, IAM, CloudWatch, Auto Scaling, Docker, Kubernetes, GitHub Actions, CI/CD, Linux, Render, Terraform (learning)

Programming & Scripting: Python, JavaScript, Bash, Java

Backend Development: Node.js, Express.js, REST APIs

Database: MongoDB, SQL, MongoDB Atlas

Tools: Git, GitHub, Postman

Concepts: Distributed Systems, Data Structures, Operating Systems

PROJECTS

Containerized Task Manager API with CI/CD & AWS Deployment | [GitHub](#)

- Developed and deployed a RESTful Task Manager API using Node.js, Express.js, and MongoDB
- Containerized the application using Docker and managed multi-container services with Docker Compose
- Implemented CI/CD workflows using GitHub Actions for automated build, testing, and deployment pipelines
- Deployed REST API on cloud platforms including AWS EC2 and Render with environment-based configuration and MongoDB Atlas integration
- Configured CRUD API endpoints and validated functionality using Postman
- Implemented structured logging and error handling to improve application reliability
- Managed source control and deployment workflows using Git and GitHub

Kubernetes Deployment for Containerized Task Manager

- Deployed Dockerized Node.js and MongoDB application using Kubernetes deployments and services
- Configured Kubernetes networking and service discovery between application components
- Validated application availability through port-forwarding and API testing in local Kubernetes clusters
- Improved deployment consistency using container orchestration principles

EXPERIENCE

Toro Tutor | Project REACH

California State University, Dominguez Hills

June 2024 – 2026

- Assisted elementary school students in improving English reading, writing, and communication skills
- Provided one-on-one academic support and guided students through learning activities
- Helped students build confidence and improve classroom participation
- Developed strong communication, mentoring, and interpersonal skills through student engagement

EDUCATION

M.S. in Computer Science & Engineering

California State University, Dominguez Hills (May 2026)

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner — AWS
Linux Essentials — Cisco Networking Academy
Azure AI fundamentals - Microsoft
AWS ML Internship
AWS Cloud Foundation Internship
Cisco Networking Essentials
Cisco Packet Tracer
Cybersecurity Essentials
